

CHOOSE A FORMULATE HORIZONTAL CURVE FOR YOUR NEXT EVENT!

The Formulate Horizontal Curve Display is a modern twist on a traditional pop up exhibition unit. Instead of individual panels, you now only need to slide a 1-piece graphic over the entire frame to produce a stunning full colour wall. Your graphic is printed on a 235gsm stretch fabric, which comes double sided as standard and with the option of having a different design either side. The frame is made out of lightweight aluminium, making it easy to transport and pack down into the fabric carry bag provided.
