

The background of the image is a dense, overlapping pattern of green leaves. The top half of the image is a lighter, semi-transparent green, while the bottom half is a solid, vibrant green. The leaves are elongated and pointed, with visible veins.

RECYCLED TABLECLOTHS, FLAGS AND BANNERS

WHAT PRODUCTS ARE AVAILABLE?

- 110gsm Flag Knitted Polyester – suitable for flags, fabric banners and tablecloths.

- 220gsm Display Polyester – suitable for fabric banners and tablecloths.

WHAT IS RECYCLED POLYESTER?

ADVANTAGES

- Reduction of energy and CO₂

With every kg of recycled PET, three kg of CO₂ are saved. Therefore, 1,000 kg of recycled PET result in a saving of 3,000 kg of CO₂. This corresponds to the average emission of a car per year.

- Reuses materials that could otherwise have gone to landfill.
- Improved Life Cycle Assessment (LCA) of recycled PET (rPET) compared with virgin PET (vPET).

SPOTLIGHT: rPET LCA

For every 1MT of polyester:

CERTIFIED BY AN INDEPENDENT TESTING INSTITUTE

UNI 11505 certification process

The independent testing institute "Certiquality S.r.l." has certified the usage of 100% post consumer recycled polyester chips for the polyester part of the yarn. For the white r-Radyarn this means guaranteed 98% rPET and 2% additives (e.g. spinning oil, can vary slightly, depending on yarn manufacturer).

This material also complies with OekoTex class 1. Where possible, we use yarn from one production batch, this ensures a consistency in the quality of the base material.
