

# Recycled Feather Flag

Printed flags are full colour dye sublimation printed so they can be printed all over, from edge to edge, without any limitations on colour or designs. These recycled flags differ from your usual printed flag because they are made using recycled polyester. Disposed consumer goods, eg single use plastic bottles, are melted down into chips, when is then spun as yarn. That yarn is knitted or woven into a roll of material which is dye sublimation printed in full colour, cut and sewn into a flag.

There are a few notable benefits from using recycled polyester:

- The plastic bottles etc that go into this material aren't biodegradable and would have either been sent to landfill or end up in the Ocean, so it is giving them a second life as a tablecloth.
- Using recycled polyester lowers the overall demand for virgin polyester which derives from fossil fuels
- Every 1,000kg of recycled PET, 3,000kg of CO2 are saved. This corresponds to the average emission of a car for an entire year

**Print Process:** Dye Sublimation

**Sizes:** Small (2.493m H), Medium (3.48m H), Large (4.688m H)

**Weights:** 110gsm

**Lead Time:** 3 – 5 working days standard, express service available
