

Recycled Fabric Banner

All of our fabric banners are full colour dye sublimation printed so they can be folded down into a small parcel for easy distribution and storage. Recycled fabric banners differ from your usual PVC printed banners because they are made using recycled polyester. Disposed consumer goods, eg single use plastic bottles, are melted down into chips, when is then spun as yarn. That yarn is knitted or woven into a roll of material which is dye sublimation printed in full colour, cut, sewn and eyeleted into a fabric banner.

There are a few notable benefits from using recycled polyester

- The plastic bottles etc that go into this material aren't biodegradable and would have either been sent to landfill or end up in the Ocean, so it is giving them a second life as a fabric banner.
- Using recycled polyester lowers the overall demand for virgin polyester which derives from fossil fuels
- Every 1,000kg of recycled PET, 3,000kg of CO₂ are saved. This corresponds to the average emission of a car for an entire year

Print Process: Dye Sublimation

Sizes: Bespoke sizes up to 3000m wide

Weights: 110gsm, 220gsm

Lead Time: 3 – 5 working days standard, express service available
