

FABRIC STRETCH FRAMES

VS
EXHIBITION UNITS

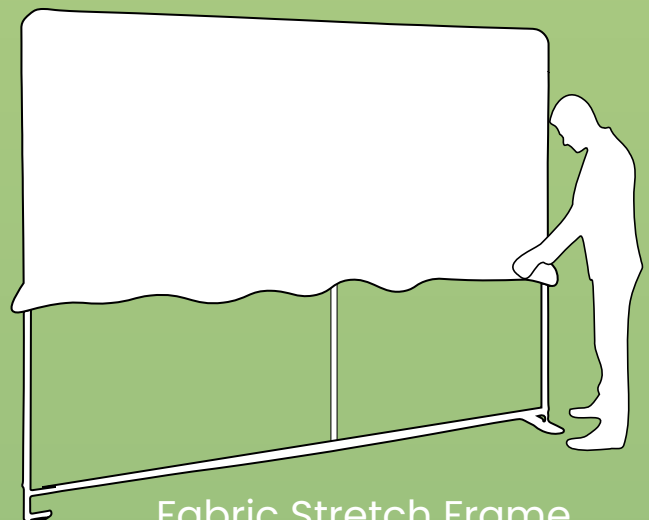

FABRIC STANDS ARE EASIER TO ASSEMBLE

The frame slots together and the graphic simply slides over. This is a lot easier than having to perfectly hang each individual panel without scuffing or denting the graphic.

FABRIC STANDS PACK AWAY INTO A SMALL TRAVEL CASE

Your customer doesn't have to drag around the old fashioned counter top any more. Fabric frames collapse down into a small travel case which they can easily throw into a car boot.

Traditional Unit

FABRIC STANDS HAVE THE ENVIRONMENTAL EDGE

Dye sublimation printed on polyester using water-based inks, fabric stands are much greener than a traditional unit. They also leave less of a footprint in transit because they weigh significantly less, without compromising on the quality of the finished stand.
